Product

PLEXIGLAS® GS Fluorescent

Selection criteria

- High luminosity
- Translucence
- Outstanding workability

Fabricator

Günter Gläser Leuchtenherstellung
Deutschneudorf
www.weigla.com

Description of the application

The Günter Gläser lighting company is located in the heart of the Erzgebirge mountains in Deutschneudorf, Germany, where it makes Schwibbögen, the region's traditional decorative candle holders. Ever since 2012, its customers have also been enthusiastic about combining wood and PLEXIGLAS® to create entirely new lighting fixtures. The use of high-quality fluorescent dyes in the PLEXIGLAS® sheets gives the resulting objects lasting luminescence. In addition to traditional Schwibbögen, newly developed lighting fixtures made with fluorescent PLEXIGLAS® can be used all year round as eye-catching additions to exhibit spaces, hotels, restaurants, bars, or even in private homes. Custom-made products are available as well upon request. The result brings modern PLEXIGLAS® lighting technology into harmony with tradition.
