## PLEXIGLAS®

### Franz Liszt Concert Hall

#### Market segment

Industrial Construction & Architecture, Specialty Glazing

#### Location

Raiding, Austria

#### Product

PLEXIGLAS® GS block material

#### Selection criteria

Producible oversized sheet in a thickness of 50 mm made of PLEXIGLAS® GS block material.

#### Fabricator

Fa. k-tec, 2009

#### Description of the application

PLEXIGLAS® was the only feasible material for a monolithic, highly transparent sheet measuring roughly 70 square meters (17.5 meters long, 3.9 meters high and 50 mm thick). This made it possible to install a highly transparent wall panel over one whole wall of the concert hall, from the floor coving to the lower edge of the ceiling. There was no need for intrusive supports, crossbars or reinforcing struts. The 5cm thick PLEXIGLAS® sheet unites the foyer seamlessly with the park.
