PLEXIGLAS®

Illuminated Design Lounge Chair

Market segment

Lighting Technologies

Product

PLEXIGLAS® XT Clear 0A000, thickness 25 mm

Selection criteria

High light transmission, unbeatable forming and processing properties.

Fabricator

Designpanel GmbH, Nürnberg
www.designpanel.de

Description of the application

Floating on light – our newly developed LED lounge chair is truly a highlight at any pool. The reduced form, the almost invisible material and the trend-setting lighting technology – a cordless, snap-on LED light rail – is the secret.

It illuminates the transparent PLEXIGLAS® from the top end, laser engraved lines absorb the light and ensure homogeneous illumination of the lounge chair. Various shades of colour or colour change sequences can be selected and firmly adjusted.
