Market segment

Lighting Technologies

Product

PLEXIGLAS® XT Tubes Clear 0A070
PLEXIGLAS® XT Tubes White WN670
Diameter: 80/72
Length: 2.580 mm

Location

Madrid, Spain

Fabricator

Estudio Eritro + Arquiem
www.arquiem.es

Selection criteria

- Rigidity
- Light fastness
- Transmission (brilliance)

Description of the application

The main goal of this project was to enlighten a space with already limited natural light. The continuing partition was created to separate the most noble rooms from the rest of the space. It is composed of PLEXIGLAS® tubes, where a high percentage of them are back-lit. The light changes all day long, to give the impression of a course of a day to the office users just as if there was natural light.
