

Instructions

for the augmented reality app PREALITY

1. Please download the “**Preality**” app (free) from the App Store or Playstore, or simply scan the corresponding QR code.
2. Open the app and enable it to access the camera.
3. Open the app menu and click on “Demo pack”. This option contains different objects which you can place in your virtual environment in their original sizes. Select “Ocari Stelaro” to place the Ocari luminaire on your own table.
4. Move your smartphone or tablet along a table surface or a floor space and click the screen to position the object once the rectangle appears. You can also select various actions from the lower menu bar depending on the object – for example turning the light on and off.
5. To move the AR projection to a different location, simply refresh the view by pressing the Refresh icon. 
6. You can use your fingers to zoom in on all AR objects and turn them, while pressing the Screenshot button captures the image as a photo.
