ABOUT US

PLEXIGLAS® Soundstop for Noise and Windbarriers

RÖHM

About Us

The breadth of our range and innovative specialty products pave our customers' way to tomorrow's markets.

The Acrylic Products Business Unit of Röhm GmbH is a pioneer and world market leader in methacrylate chemistry.

- Acrylic was invented in 1933 by Dr. Otto Röhm, and PLEXIGLAS® is a registered trademark. In the Americas, our noise control products are marketed under the ACRYLITE® Soundstop trademark. With its high proportion of specialties and system solutions, the business unit ensures the constant further development of existing market segments and the discovery of new potential in future-ready applications. The breadth of our range and innovative specialty products pave our customers' way to tomorrow's markets.
- The business unit opened up the noise control marketsegment in 1980 with the specially developed product PLEXIGLAS® Soundstop. Since then, both the products themselves and the product range have undergone continuous development and been adjusted to the requirements of the global market.
- Today, noise barriers made from PLEXIGLAS® can be found in Europe and Australia as well as in many countries of Asia and in the USA. The Acrylic Products Business Unit pursues the same targets as Röhm GmbH as a whole. With our innovations, we would like to help achieve effective results in our fields of application and improve the quality of life for people everywhere, at all times.

United Nations Sustainable Development Goals: How PLEXIGLAS® supports sustainable action

The United Nations' 2030 Agenda for Sustainable Development aims to shape global economic progress in a socially just manner and within the Earth's environmental limits. At the heart of this agenda are 17 Sustainable Development Goals (SDG). These goals are to be achieved by 2030 through the joint efforts of states, companies and civil society. We at Röhm GmbH are also contributing toward this necessary change – through both our PLEXIGLAS® products and our company's sustainability strategy.

Find out which SDGs are particularly relevant for us and how PLEXIGLAS® supports sustainable action at www.plexiglas.de/eco.
