Selection criteria

- More durable than glass
- Easy to process and work
- Transparency
- Available in tube and block form

Application description

The beer glasses were manufactured for celebrating Germany's Bundesliga soccer championships. A PLEXIGLAS® tube (diameter: 80/70 mm; length: 700 mm; blow molded) was used as the starting material for the body of the glass. The base was made by lathing and polishing a 150 x 150 x 80 mm block, which was then bonded to the body.
