Description of application

BELUX AG at Weil am Rhein–Haltingen markets the TWILIGHT lamp made from PLEXIGLAS® Textures Clear 0A000Z Pyramid. This lighting fixture has been on the market for many years and continues to be one of the company's best-selling products. Main fields of application: banks, hotels and public institutions

TWILIGHT provides individual ambient and mood lighting. Inside the body made of PLEXIGLAS®, there are two light sources each at the top and the bottom that cast light in opposite directions. The indirect light also makes it possible to illuminate rooms via the ceiling. The indirect ambient light and the direct mood light can be dimmed independently of each other. TWILIGHT is available in an LED and a halogen version.
