Biennale Venice

Market segment

Industrial Construction & Architecture,
Specialty glazing

Product

PLEXIGLAS® GS Block material

Location

Venice, Italy 2011

Fabricator

Heinz Fritz Kunststoffverarbeitung
www.heinz-fritz.de

Selection criteria

- PLEXIGLAS® Block material available in big sizes
- high-performance ACRIFIX® adhesives available

Description of the application

The international art festival in Venice shows works of four international accepted contemporary artists to the topic "Entropy". One of them is Alexander Ponomarev, whose great installed water installations are embossed from his former activities at the Russian marine. At the Biennale he presented his monumental creation „Formula“.

„Formula“ is made of two eight meters high PLEXIGLAS® tubes with a diameter of one and a half meters each and a wall thickness of six centimeters. The weight of each tube is three tons and is filled with water from the lagoon and a Men-Robot-Machine.

The tubes were manufactured out of PLEXIGLAS® block material and installed in Venice by the company Heinz Fritz in Herbrechtingen, Germany.
