PLEXIGLAS®

Global Mining Equipment Leader Strikes Gold By Using PLEXIGLAS® in Headquarter Redesign

Market segment

Lighting Technologies

Location

Milwaukee, Wisconsin

Product

PLEXIGLAS® Satinice, white

Selection criteria

- frosted appearance gives excellent diffusion properties
- the surface hides scratches and fingerprints very well

Fabricator

BSI

Additional design services were provided by HLA Business Interiors and GRäEF. CG Schmidt served as the general contractor for core and shell on the project.

Description of the application

One key design element was the implementation of two types of lighting – traditional overhead incandescent and a LED lighting wall, hidden behind taught fabric that would accent the high ceilings. The LED wall would be prominent and offer a subtle lighting feature when other primary lights were turned down for presentations.
