PLEXIGLAS®

Carport with PLEXIGLAS® Resist double-skin sheeting

Market segment

Home and garden

Location

Germany

Product

PLEXIGLAS® Resist SDP 16/64 AAA White WRS30

Fabricator

Carport-Visionen — manufacturers of exclusive steel carports

<http://www.carport-visionen.de/>

Selection criteria

- Weathering resistant
- Easy care thanks to anti-algae finish
- Weight savings compared to glass, so that steel-structure costs are reduced
- Optimal light transmission combined with comfortable shading

Description of the application

PLEXIGLAS® Resist multi-skin sheeting with web spacing of 64 mm offers glass-like transparency combined with high impact resistance.

It is provided with a special anti-algae finish that reduces the growth of algae and mosses, so that cleaning costs are reduced to the minimum. The sheeting offers optimal protection from the effects of weathering and is available in a range of colors and surface textures.

A 3 x 3 m bike shed has been integrated with the 5 x 5 m double parking space, both having a single, continuous roof.

Thanks to translucent light transmission, the car parking area is comfortably shaded while adequate illumination is available in the bike shed.
