

Reference

PLEXIGLAS®

Conference Center Badajoz

Market segment

Industrial Construction & Architecture,
Roof and facade

Location

Badajoz, Spain

Product

PLEXIGLAS® Resist tubes, 17.519 m²

Selection criteria

High technical and creative potential as a material for facade, possibility to play with light effects, extremely high UV resistance, material is able to conduct and diffuse artificial light, facade appears airy, almost weightless

Fabricator

Biacryl S.A., 2006

Architects

Selgascano (José Selgas y Lucia Cano)

Description of the application

The 4.39m long white tubes were linked with each other by clear, 16cm long ones. Specially developed silicone gaskets provide the requisite stability. The 4,248 white tubes and 4,104 connecting tubes were made from hard-wearing, impact-resistant PLEXIGLAS® Resist. They were thermoformed to the final shape. Especially for this project the PLEXIGLAS® tubes, were manufactured and adapted.
