- 92 % Transmission
- UV absorbent
- Very easy to machine and fabricate
- Can be formed into almost any required shape

Description of the application

The Cube Oceanarium is located in the heart of Chengdu's modernest and largest shopping precinct - Seaside City. This cylinder aquarium is the main part of the Ocean Exhibit in Cube Oceanarium, one of the largest aquarium installation in China.

The challenge of the installation was to join three pieces of thermoformed panels to one cylinder.
