Selection criteria

- Excellent resistance to UV radiation within the tanning bed
- PLEXIGLAS® sheets have outstanding transmission properties
- Highly impact-resistant outer panels
- PLEXIGLAS® LED provides optimum light distribution
- Exceptionally sophisticated surface design
- Extensive processing options
- Quality of all materials is uniformly high

Application description

Ergoline® tanning beds are high-quality tanning units for use throughout the world in tanning studios, fitness centers, and wellness applications.

Ergonomic concepts for exemplary tanning comfort are one of the core competences of Ergoline and guaranteed by the brand name alone.

One example of this is the ergonomically designed base with integrated pillow and variable footrests for a seamless tan. Available only from Ergoline.
