PLEXIGLAS®

Greenhouse Holzem in Germany

Market segment

Industrial Construction & Architecture,
Greenhouse

Location

Mönchengladbach, Germany

Product

PLEXIGLAS® Alltop SDP, approx. 6.000 m², built in
2012

Selection criteria

- high light and UV transmission
- energy efficiency
- excellent resistance to weathering and aging

Fabricator

Maurice, Horst, Netherlands

Description of the application

Achim Holzem's business is well-known for its high-quality pot plants. The family company looks back on a long tradition, and manager Achim Holzem represents its sixth generation. In the spring, the company cultivates bedding and balcony plants such as zonal and ivy-leaved pelargoniums, busy lizzie 'New Guinea', petunias, and primroses. In the fall, they follow on with poinsettias, which put forth their bright red bracts in the period before Christmas. It takes perfect conditions to produce such high-quality pot plants. Energy-saving PLEXIGLAS® Alltop double-skin sheets combined with modern energy shields fit the bill exactly. The UV transmission of the PLEXIGLAS® Alltop sheets makes the plants robust and bushy, and ensures that they develop intense colors.
