

Reference

PLEXIGLAS®

Greenhouse Van Oordt in Switzerland

Market segment

Industrial Construction & Architecture,
Greenhouse

Location

Stäfa, Switzerland

Product

PLEXIGLAS® Alltop SDP, approx. 3.700 m², built in 1997

Selection criteria

- high light and UV transmission
- energy efficiency
- excellent resistance to weathering and aging

Fabricator

Thermoflor, Heerlen, Netherlands

Description of the application

Thomas van Oordt, a cut-flower grower in Switzerland, has many years of experience with PLEXIGLAS® multi-skin sheets. His greenhouse location offers a magnificent view of Lake Zurich. The good lighting and climate conditions under UV-transmitting PLEXIGLAS® Alltop double-skin sheets provide cut flowers and pot plants of excellent quality. Van Oordt is a real PLEXIGLAS® pioneer. Back in 1983, he was the first grower in Switzerland to try cultivating cut flowers under triple-skin glazing made of PLEXIGLAS® S3P 32. With great success!
