PLEXIGLAS® Satinice

Selection criteria

- frosted texture evenly diffuses light while maintaining high light transmission
- easy printing directly on 8'x4' sheets of PLEXIGLAS® Satinice (thin enough and durable enough for the printer to image directly onto)

Fabricator

Gilmore Reproductions

Description of the application

Canadian office of leading global architecture and engineering firm uses printed PLEXIGLAS® Satinice panels to create dramatic conference room paying tribute to city's nautical history.

HDR's Kingston, Ontario office celebrates the city's heritage and inspires clients, colleagues to navigate the future together.

HDR's Vice President and Design Principal Jason-Emery Groën recently worked with the HDR team to create the firm's 4,000 square-foot new space. Central to their design was the company conference room—a series of interconnected PLEXIGLAS® Satinice panels forming the oval shape of ship's hull and printed with historical navigation maps of Kingston's surrounding waterways.
