## PLEXIGLAS®

### LOOP art project

#### Product

PLEXIGLAS® GS Clear, thickness 25 mm, laminated with PLEXIGLAS® GS Blue 5C50

#### Location

Tax Office Annex, Fürth 2013, Germany

#### Design

Ulrich Brüscke

[www.ulrichbruescke.de](http://www.ulrichbruescke.de)

#### Fabrication

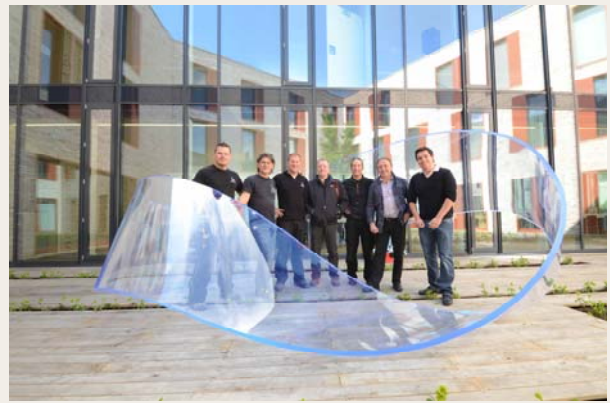

axis GmbH & Co. KG, Nürnberg, Germany

[www.axis-expotechnik.de](http://www.axis-expotechnik.de)

#### Selection criteria

PLEXIGLAS® is simply handled and processed, and easy to form and bond.

Its transparency gives it a weightless, light, and esthetically attractive appearance.

#### Description of the application

LOOP is a PLEXIGLAS® sculpture 5 meters long, 3 meters wide, and 2 meters high, based on a design by the artist Ulrich Brüscke.

It is what is known as a Möbius strip, a strip given a half-turn after which the ends are joined together: an object that, although seemingly contradictory and self-contained, relates to its environment, which it reflects, mirrors, and filters.

The company axis provided consulting services and implemented the project. The strip, 1.25 m wide and 12 m long, was three-dimensionally thermoformed in several sections, which were subsequently bonded together, and the complete sculpture was then transported to its installation site. axis achieved the blue shimmer of the material by laminating sheets of transparent and colored PLEXIGLAS®.
