PLEXIGLAS®

Machine protection with PLEXIGLAS®

Product

PLEXIGLAS® GS Grey 7C83, thickness = 6 mm

Processing

HECKER® Kunststofftechnik Dortmund
(www.plexiglas-hecker.de)

Customer

E. Zoller GmbH & Co. KG

Selection criteria

- Occupational safety
- Noise protection
- Process control during ongoing operation; attractive design that promotes sales

Application description

By taking machine innovation and performance to an emotional level, visually appealing machine protection solutions help finalize sales. HECKER® Kunststofftechnik uses transparent PLEXIGLAS® to produce just this kind of machine protection solutions for the Zoller company's new "titan"—a universal measuring machine for metal cutting tools, made by the leader in quality and innovation in the metrology industry. HECKER® makes this visually attractive, high-quality machine window solution from grey transparent PLEXIGLAS® GS 7C83 plates that the company first thermoforms and then cuts to precision on a 5-axle-CNC machine for a perfect fit.
