

Reference

PLEXIGLAS®

megaSun Tower pureEnergy 5.0 with vibraNano

Product

PLEXIGLAS® GS, UV permeable

Processor

KBL AG, Dernbach
www.kbl.de

Selection criteria

- Excellent resistance to UV radiation within the tanning bed
- PLEXIGLAS® sheets have outstanding UV and light transmission properties
- Excellent processing and forming properties

Application description

Tanning and toning—thanks to the megaSun vibraNano and the side-to-side motion of its vibration plate, you can do both. In sessions of just 10 minutes each, this booth exercises the abs, thighs, and glutes in a way that simulates walking.

The high-quality, scratch-proof PLEXIGLAS® surface of the vibration plate prevents wear for the life of the product. vibraNano is available as an option in all tower models, such as the megaSun Tower pureEnergy 5.0 shown here.
