Description of the application

In addition to classic Schwibbbögen candle holders, the Günter Gläser lighting company of Deutschneudorf, Germany, began making modern light fixtures from PLEXIGLAS® and wood in 2012. These eye-catching pieces are suitable for use all year round in exhibit spaces, hotels, restaurants, bars, or private homes. Custom-made products are available as well upon request.

The result brings modern PLEXIGLAS® lighting technology into harmony with tradition.
