**Description of application**

Lighting concept for decorative and functional ceiling lamp ORBIS for caravans from Fendt-Caravan.

A light-emitting graphic creates functional light using high-performance LEDs and PLEXIGLAS® that has been fabricated to the highest of standards.

Ergonomic lighting: very soft shadows, diffuse area lighting and absolutely glare-free illumination.

Since they are produced by means of laser engraving, the light-emitting graphics can be customized and individually adapted.

High-quality design meets functionality!
