PLEXIGLAS®

Police station façade, Vienna

Market segment

Industrial Construction & Architecture

Location

Vienna, Austria

Product

PLEXIGLAS® Mineral

Selection criteria

Extremely brilliant material that can be homogeneously formed, with very good fabrication properties; sheets available in large sizes and various colors.

Fabricator

Kunststofftechnik Fa. k-tec, Fassadenbauer Fa. Drascher, 2011

Description of the application

The façade of a police station in Vienna was completed using this innovative material. Large, glossy white façade sheets installed on the wall and ceiling give the compact building its striking look. This is underlined by the curved façade sheets at the corners of the building, which lend it a uniformly organic shape. The Austrian Federal Police logo that was inlaid in the façade using blue and red PLEXIGLAS® Mineral shows the building's function at first glance, while also demonstrating the versatile design options offered by this mineral-based material.
