- Good light-conducting properties
- Elegant, high-gloss surface
- Works very well with adhesives
- Wide variety of excellent processing options

Fabricator

Jaeger Kunststoffverarbeitung GmbH
Gladbacher Str. 17, 52525 Heinsberg, Germany

Customer

Blanco GmbH & Co.KG, 75038 Oberderdingen,
Germany

Application description

Jaeger responded to its customers' demands for a transparent sink, creating a model in which water lines run through mirrored PLEXIGLAS® pipes onto which faucets are mounted.

In addition, air bubbles rise up along the outer walls of the sink, which are illuminated by LEDs.

The sink was made of PLEXIGLAS® GS (30 mm). The base, frame and apron are made of clear, finished PLEXIGLAS® GS (5 mm), and the floor consists of PLEXIGLAS® GS Clear (20 mm) with a subsequent mirror finish.

The dimensions of the sink are 3000 x 1200 x 1200 mm, with a total weight of 2500 kg. The fixtures are hooked up and fully functional.
