

Reference

PLEXIGLAS®

Luminous world map

Market segment

Furniture, exhibition, shopfitting

Location

Frankfurt, IAA 2015, Schaeffler AG booth

Product

PLEXIGLAS® GS Clear 0F00 GT, thickness 20 mm, laser engraved

PLEXIGLAS® LED, thickness 8 mm

PLEXIGLAS® Satinice, thickness 6 mm; light emitting diodes

Fabricator

axis GmbH & Co. KG, Nuremberg, Germany

www.axis-expotechnik.de

Selection criteria

- High light transmission
- Perfectly homogeneous illumination
- Excellent processability

Description of the application

At the Schaeffler booth, a large light-graphic world map showed the company's sites in changing luminous colors. For this, the continents were engraved on a transparent PLEXIGLAS® sheet and edge-illuminated by RGB LEDs. The cars, similarly illuminated, were mounted at an offset in front of the sheet. Each of the cars is a free form shape consisting of Lightpanel slim covered with PLEXIGLAS® sheeting. The PLEXIGLAS® sheet is printed on the reverse.

The light wall, made up of three segments joined together, occupies a total area of about six square meters.
